E-mail hendrotrtangardi@gmail.com | **LinkedIn** linkedin.com/in/hendrotirtaangardi/

I am an Informatics Engineering student who is always thrilled about new things! I have experience working in several positions in the IT field. I am quick to adapt to dynamic environments and actively immerse myself in the study of various programming languages and IT fields. I possess strong creativity, analytical skills, and an unbridled passion for learning and adapting to the rapidly changing digital world!

WORK EXPERIENCES

(Internship) - January to March 2019

The Sultan Hotel Jakarta - IT Support Technician

Perform hardware, software maintenance and internet network repairs. Ensure all devices are ready to be used by employees in each division and program room access keys using VingCard.

(Internship) - March to June 2023

Elladine Official - Front End Developer

I successfully used markup languages such as HTML, PHP, and CSS to create easy-to-use E-Commerce websites. My responsibilities include designing websites, building interfaces, navigation, and aesthetics that attract users' attention, and integrating software with existing systems.

(Internship) - August to February 2023 - 2024

Berani Digital ID - Software Engineer

Contributed to the development of a temperature monitoring application for swimming pools as a feasibility indicator, using Laravel framework and PGSQL database. Ensuring smooth application performance and compliance with specified requirements.

(Project - Based Internship) - 2023 - 2024

Core Initiaive x Rakamin Academy - Front End Developer

Successfully finished various tasks related to the activity of Front End Developer and gained proficiency in JavaScript, particularly in the Vue framework, and acquired skills in CI/CD tools like Docker, Unit Testing using Jest, and Deployment.

BTPN Syariah x Rakamin Academy - Fullstack Developer

Create an API from the GoLang language. Create API for uploading and deleting images. The API formed are POST, GET, PUT, and DELETE. Using several tools such as Gin Gonic Framework, Gorm, JWT Go, and Go Validator. And using the PostgreSQL database.
